

I build websites and web applications, and work across the cloud services, infrastructure and integrations behind them. From the interface to the operating environment, I keep the whole system in view.

## 01 Experience

### Freelance

Present

#### Cloud & Infrastructure Engineer

Independent freelance work across web development, cloud infrastructure and automation, including ongoing DevOps work for Visnovo. It draws on a background in full-stack applications, hosting and DevOps.

Web development · Cloud & infrastructure · Automation · Hosting · DevOps

### DataBalk

Previous role · started 2025

#### Cloud Service Engineer

Operated and improved a Microsoft-cloud application ecosystem where customer questions crossed Azure infrastructure, Entra identities, Microsoft 365, business applications and external integrations. Traced ownership, shaped controlled changes and verified the result.

Azure · Microsoft Entra · Microsoft 365 · Power Platform · Business Central · Application Insights

### ITQ

2025

#### Support Engineer

Supported virtual workplace and remote-desktop services across multiple Dutch hospital environments. Investigated incidents through the VMware and Citrix delivery layers, Windows Server infrastructure and NetApp storage within monitoring and SLA-driven operations.

VMware · Citrix · Windows Server · NetApp · Monitoring · SLA operations

### Visnovo SRL

2019-Present

#### DevOps Engineer · freelance

Continue to develop full-stack solutions, manage customer delivery and take responsibility for company infrastructure plus customer email and web-hosting environments.

DevOps · Full-stack development · Web hosting · Email hosting · Customer delivery

## 01 Experience continued

### Obsite

2019-2024

#### Founder

Founded and led a digital agency focused on the technical side of websites. Combined hosting, development, optimisation and SEO with direct client advice, partner delivery and hands-on Linux operations before Visnovo took over the business.

Linux · Proxmox · Web development · Hosting · SEO · Client consulting

### UC Systems

2018-2019

#### Systems Administrator & Technical Support

Managed servers, networks and workstations while supporting customers across Windows Server, Microsoft 365, Outlook and Office environments.

Windows Server · Microsoft 365 · Networking · Workstations · Technical support

### HD Services

2016-2017

#### Windows Systems Administrator & Technical Support

Supported customer networks, servers and applications, monitored infrastructure for failures and performance issues, and helped keep backup processes dependable.

Windows administration · Networks · Backups · Monitoring · Customer support

## 02 Technical expertise

### Web development & automation

TypeScript · React & Node.js · HTML & CSS · Web platforms & CMS · Python · PowerShell

### Cloud & identity

Microsoft Azure · Microsoft Entra · Microsoft Graph · RBAC & PIM · Key Vault · App Configuration

### Infrastructure

Linux · Windows Server · Proxmox · VMware · Citrix · Hyper-V

### Applications & operations

Microsoft 365 · Power Platform · Dynamics 365 · Business Central · Application Insights · Azure DevOps

## 03 Education & languages

2018-2020

### Network & Systems Administration

MBO level 4 coursework · Davinci College · left early to start Obsite

2016-2017
